

Xenon Site Visit Log — #Week 3

Field	Record
Visit number	Visit 1 / 2 / (3) / 4 / 5 / 6 / 7 / 8 / 9 / 10
Date of visit	18/07/2026
Time – Start : 2:30 pm	End: 3:10 pm
Business name	Quick Start Driving School
Business address	KNUST, Ayeduase Gate
Business contact name	Regan Musud
Contact's role	Secretary
Team members present	1. Asuako Reginald 2. Melvin Yalwui 3. Adwoa Animah Odame 4. Kutani Mawulikplim Komla 5. Ibrahim Salma Niina
Purpose of visit	- Review the wireframes and provide feedback on usability. - Suggest any changes before development progresses further. - Confirm that the proposed interface aligns with current business operations.
Key outcomes / findings	- Student profile must give an at-a-glance summary: registration date, payments made, lessons taken, and licence status. - Licence process clarified: eye test → learner licence (issued/not issued) → scheduled exam date (entered in advance) → result (passed/failed) → licence issued. Applies only to licence-inclusive enrolments (Driving only / Licence only / both). - Owner needs queryable licence status lists (issued vs. pending, with counts) for compiling DVLA batches. - Each completed lesson must record which instructor took it, for per-instructor lesson totals; schedule tracked by participant counts per slot; attendance is sign-in only (sign-out was tried and abandoned). - Payment records must lock once a receipt is issued i.e. only the Manager may correct them. Owner recounted how a previous system failed: receipts were edited, then profiles deleted and recreated to reissue them. - Priorities confirmed: registration, payment tracking, and the profile summary first; reporting kept minimal; functionality valued over interface aesthetics.
Follow-up actions agreed	Review wireframes with client, incorporate feedback, begin frontend and backend implementation, and prepare MVP demonstration.
